

BANGLADESH MOBILITY SNAPSHOT

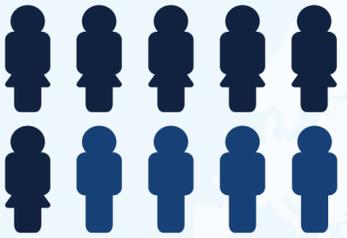

People & Transportation

176,611,272

Bangladesh has a population of 176.6 million, making it one of the most densely populated countries in the world.

Population Pressure is especially high in the central and eastern regions, where major cities and industrial zones are located. This density influences everyday life from urban congestion to demand for public transport.

70% Road Space

In Dhaka, people's personal cars use the majority of road space, costing the economy an estimated 3.2 million working hours daily in gridlock.

Motor Vehicle Population

540,4137

Bangladesh's motor vehicle population is expanding every year, led by motorcycles, which dominate personal transport. Ownership rates are highest in major cities, where economic activity and mobility demand are concentrated.
